

Design Document for The Game

Junepng Jiang

Goals:

- **Designer:** Make the user give up the game, and entertain the player and audience
- **Player:** Pass the Game using as few lives as possible.

MDA:

- **Mechanics:** The player can move left / right by pressing the A/D keys and jump by pressing Space. No double jump is allowed. Get through the door at the end of the map to go to the next level or pass the game.
- **Dynamics:** Kill the character by falling plates, invisible blocks that forces that the player cannot jump through the rift unless the player remembers the blocks, and hidden trips.
- **Aesthetics:** This game is designed to entertain users and audiences.

Gameplay Overview / Rules:

Key A/D for move to left/right, space for jump, no double jump is allowed.

Winning and Losing Criteria:

No losing game, lose lives by 1, the life can go negative. Pass all levels of maps to win the game.

Expected Game Duration:

Session Length

3-5 minutes for a map if everything is going well.

Total Playtime

The player will spend a few minutes remembering all the traps to pass the game

Technical Considerations:

Feedback:

Difficulty is ok, but players want the control layer to be clearer.
